

CUBICO® IRREGULAR
CREATIVITY

“Be simple.”

CUBICO® creates striking setting patterns and wonderful symmetries: peacock tails or fans, overlapping arcs or parallel rows. Thanks to its original beauty it has been created to meet the highest requirements in terms of quality. CUBICO® is available in different shapes: it can not only be used for pedestrian and light vehicle traffic, but also for heavy vehicle traffic. Each cube is accurately produced by the splitting of rough natural porphyry slabs.

CUBICO® IRREGULAR

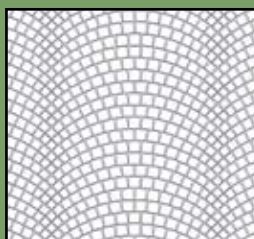

Cubeshapedcobbleswithvariabledimensions, produced in different sizes and used to create high quality setting patterns.

CUBICO® IRREGULAR CREATIVITY

CUBICO® IRREGULAR is a particular selection of porphyry cubes produced by the splitting – through special Steinex trances – of raw natural slabs. The cobbles are cube shaped with non orthogonal faces and the sides may be not perfectly square. They may be laid in a large variety of patterns such as overlapping arcs, peacock tails or fans, concentric circles or parallel rows. CUBICO® IRREGULAR is produced in different sizes, which can be used according to the application of the building element. Cubes 4x6 cm and 6x8 cm are generally used for pedestrian and/or light vehicle traffic areas, while 8x10 cm are used for heavy vehicle traffic areas.

| Dimension in cm | Thickness in cm | Weight kg/m ² | m ² /Ton | Colour |
|-----------------|-----------------|--------------------------|---------------------|---------|
| 4 x 6 | 4 - 6 | 100 | 10 | A-B-C-D |
| 6 x 8 | 6 - 8 | 135 | 7,5 | A-B-C-D |
| 8 x 10 | 8 - 10 | 190 | 5,30 | A-B-C-D |
