

CUBICO® REGULAR
CREATIVITY

“Be simple.”

CUBICO® creates striking setting patterns and wonderful symmetries: peacock tails or fans, overlapping arcs or parallel rows. Thanks to its original beauty it has been created to meet the highest requirements in terms of quality. CUBICO® is available in different shapes: it can not only be used for pedestrian and light vehicle traffic, but also for heavy vehicle traffic. Each cube is accurately produced by the splitting of rough natural porphyry slabs.

CUBICO® REGULAR

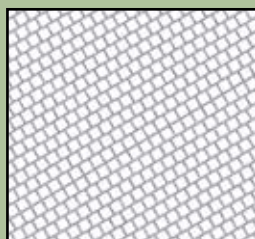

It is a special selection of squared cubes with dimension 10x10 cm and variable thickness. Their unique uniformity allows to obtain pleasant paving and to simplify the setting even for the creation of ornamental shapes and details.

CUBICO® REGULAR CREATIVITY

CUBICO® REGULAR is a particular selection of cubes with a regular section created to simplify the installation and to achieve specific designs and setting parallel line patterns. The CUBICO® 10x10 cm format – produced by splitting raw slabs using special Steinex trances – is available in four different thicknesses and can be used not only for external paving, but also for interior floors. The 10x10 cm with thickness 2-4 cm is particularly suitable for both internal floors and for limited space areas. The Cobbles with th. 4/6 and 6/8 are used for urban paving with pedestrian areas and light vehicle traffic, while the 8/11 cm is suitable for heavy vehicle traffic.

Dimension in cm	Thickness in cm	Weight kg/m ²	m ² /Ton	Colour
10 X 10	2 - 4	75	13	A-B-C-D
10 X 10	4 - 6	110	9	A-B-C-D
10 X 10	6 - 8	150	6,5	A-B-C-D
10 X 10	8 - 11	200	5	A-B-C-D
