

# PALLADIUM® OPUS INCERTUM ELEGANCE

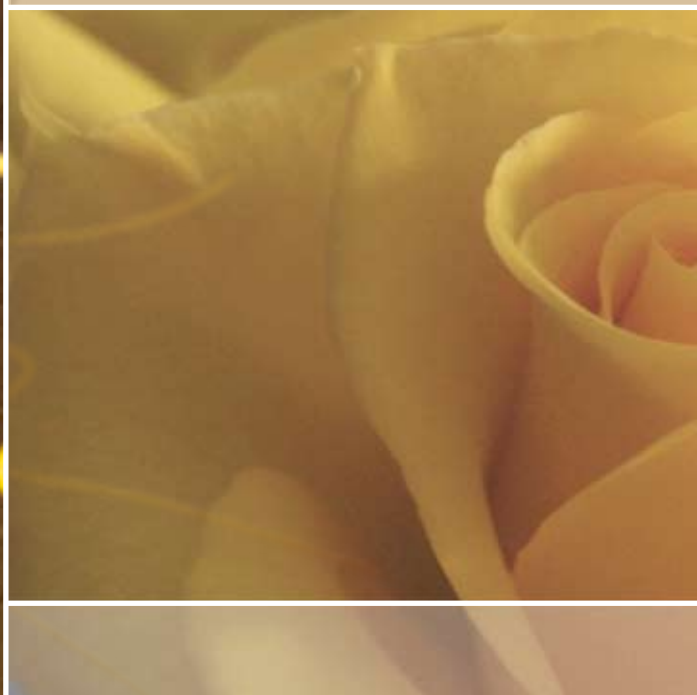

“How to create  
a nice equilibrium.”

*PALLADIUM® comes from the careful selection of porphyry slabs with natural surface and variable thickness for the realisation of opus incertum (irregular) or regular slab pavings. It is a very simple paving typology and this simplicity reflects its fair charm and appeal.*

## *PALLADIUM® OPUS INCERTUM*

*Extracted from the quarry through an accurate selection of irregular slabs. Every slab is selected according to colour shade, dimension (diagonal) and thickness.*

## PALLADIUM® OPUS INCERTUM ELEGANCE

*PALLADIUM® Opus Incertum is produced through an accurate selection of porphyry slabs with natural surface corresponding to precise characteristics. The thickness and the n° pieces/m2 are variable and depend on the selection; the diagonal (↗) shows the minimum and maximum dimension of the pieces for each selection. The different sizes are packed in 20 m2 self-supporting wooden crates.*
